## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-10, 24-27, and 36-39, drawn to an electron focusing apparatus, classified in class 250, subclass 396R.
- II. Claims 11-23, 28-35, and 40-53, drawn to particle detector, classified in class 250, subclass 315.3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions defined group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention defined by group I has separate utility such as an electron source with focusing means. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is also reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
